

FARMER'S WIFE TOO ILL TO WORK

**A Weak, Nervous Sufferer
Restored to Health by Ly-
dia E. Pinkham's Veg-
etable Compound.**

Kasota, Minn.—"I am glad to say that Lydia E. Pinkham's Vegetable Compound has done more for me than anything else, and I had the best physician here. I was so weak and nervous that I could not do my work and suffered with pains low down in my right side for a year or more. I took Lydia E. Pinkham's Vegetable Compound, and now I feel like a different person. I believe there is nothing like Lydia E. Pinkham's Vegetable Compound for weak women and young girls, and I would be glad if I could influence anyone to try the medicine, for I know it will do all and much more than it is claimed to do."—Mrs. CLARA FRANKS, R. F. D. No. 1, Maplecrest Farm, Kasota, Minn.

Women who suffer from those distressing ills peculiar to their sex should be convinced of the ability of Lydia E. Pinkham's Vegetable Compound to restore their health by the many genuine and truthful testimonials we are constantly publishing in the newspapers.

If you have the slightest doubt that Lydia E. Pinkham's Vegetable Compound will help you, write to Lydia E. Pinkham Medicine Co. (confidential) Lynn, Mass., for advice. Your letter will be opened, read and answered by a woman, and held in strict confidence.

Tragedy.

"Do you mean to accuse Charles of cruel and inhuman conduct?" said the young woman's mother.

"Yes, I do," replied the weeping wife.

"This is terrible. Tell me what you have suffered."

"I left him at home while I went away for the summer and he was so cruel and inhuman that he forgot to feed the dog or the goldfish or the canary bird or anything."

Defined.

Harry—Paw, what is a henpecked husband?

Paw—A man whose nerve is in his wife's name.

The Salvation army is fifty years old this year. It was founded in 1865 by Gen. William Booth.

When the heart is young the face seldom grows old rapidly.

Don't carry a gun when you are hunting for work.

What to Do for Itching Skins

Eczema, ringworm and other itching, burning skin eruptions are so easily made worse by improper treatment, that one has to be very careful. There is one method, however, that you need not hesitate to use, even on a baby's tender skin—that is, the resinol treatment. Resinol is the prescription of a Baltimore doctor, put up in the form of resinol ointment and resinol soap. This proved so remarkably successful, that thousands of other physicians have prescribed it constantly for 20 years.

Resinol stops itching instantly, and almost always heals the eruption quickly and at little cost. Resinol ointment and resinol soap can be bought at any druggist's, and are not at all expensive.

WERE DESTINED FOR GERMANY

British Prize Court Condemns American Packing House Products Valued at \$15,000,000.

London, Sept. 17.—The British prize court today condemned the greater part of the American products forming the cargoes of four steamships. Products, valued at \$15,000,000, are declared forfeited to the crown.

The judgment was delivered by Sir Samuel T. Evans, president of the court. It involves the cargoes of the Norwegian steamships Kim, Alfred Nobel, Bjornstjerne Bjornson and Fridland. All the goods on these vessels, consisting principally of American meat products, are confiscated, with the exception of a small proportion, which the court released to claimants.

The case has been pending for several months. The steamships were seized last November, and although efforts were made by the American owners to obtain an early trial, the British authorities set the hearing for June. The hearing closed last month and judgment was reserved until today.

In a lengthy judgment, Sir Samuel said it was plain these ships were carrying towards Copenhagen, when captured, more than thirteen times the amount of goods which under normal circumstances would have been taken to that port. That fact gave practical and overwhelming assurance that the goods were intended to find their way to Germany although, of course, it did not prove conclusively that they were destined for an enemy of Great Britain.

The court disallowed sixteen claims, including those of the Morris, Armour, Hammand, Swift and Sulzberger companies. It allowed eight claims, including that of the Cudahy company of Chicago. The others were Danish consignees.

Washington Not Excited.

Washington, Sept. 17.—No action by the United States government in connection with the condemnation of American meat cargoes by the British prize court is contemplated at the present stage. State department officials explained today that, while there have been some preliminary steps toward diplomatic negotiations over the seizure of the cargoes, action has been withheld because the American packers preferred to exhaust all legal remedies in England before invoking the aid of their government.

EXPECT TO BREAK RECORDS

American Royal Live Stock Show Gets Many Entries in All Classes This Year.

Kansas City, Sept. 17.—The fact that the American Royal Live Stock Show will be held this year in Convention Hall on October 4 to 9, instead of at the stock yards has not lessened its popularity with the exhibitors of pure bred cattle. On the contrary, it seems to have made them even more anxious than usual to exhibit. The lists of entries so far received by Secretary R. J. Kinzer indicate a record breaking display.

In the Hereford division 353 head have been entered.

The list of Shorthorn entries was received yesterday from Secretary F. W. Harding of the Shorthorn association. It contains 349 head. The Aberdeen-Angus and Galloways are yet to be heard from.

There will be thirty-two Shorthorn exhibitors from eleven states. Of the animals entered, 229 are in the breeding classes and twenty are fat steers. In the fat cattle classes the largest exhibition will be the Kansas State Agricultural College at Manhattan. A special classification for milking Shorthorns has been added and \$300 appropriated for prizes.

MAKE BIG PROFITS ON CARS

The General Motors Company of New York Earned 80 Per Cent Last Year.

New York, Sept. 18.—Shares of the General Motors Company, which owns the stock of the companies that manufacture the Buick, Cadillac and Oakland motors, and controls some other companies, advanced \$28 a share to \$291 this morning, following the announcement of a 50 per cent cash dividend declared yesterday afternoon. The stock sold as low as \$38 a share in 1914.

The annual report of the company shows net profits of \$14,926,000 on gross sales of \$41½ million dollars. After paying interest and preferred dividends the surplus for the year was equal to 8 per cent on the company's 16½ million of common stock.

C. W. Nash, president of the General Motors Company, said today that the report that the company had been able to declare a 50 per cent dividend by reason of a large business in war supplies was incorrect.

DEFENSE IS GAINING

Opposition Arguments of Congressmen are Being Toned Down Considerably.

WILL SUPPORT THE PRESIDENT

Public Generally Becoming Interested in Larger Army and Navy—Stone Wants a Change.

Washington, Sept. 20.—There has been a decided toning down in the last two weeks in the attitude of congressmen who oppose an elaborate national defense program in Congress next winter. Members of the Senate and House have found that their constituents are actually interested in the question of strengthening the army and navy. As a result of interviews printed with Representative Hay, chairman of the House committee on military affairs, and Representative Kitchen, leader of the House, and Senator Tillman, chairman of Senate committee on naval affairs and Senator Chamberlain, chairman of the Senate committee on military affairs, the people at home have commenced to discuss seriously the question of better national defense.

Senator Stone, who just has returned from an extended tour of the West, including some of the Pacific Coast states, says he believes the average American citizen is in favor of going a little farther than preparing the army and navy to repel an invasion. He believes they would strengthen both the army and navy and make them fit for duty on short notice if an enemy became aggressive. He is opposed to a large standing army, but would bolster up the present organization.

They Will Support Wilson.

The attitude of most of the Democratic congressmen toward the proposed national defense program is that of compliance with the wishes of the President. It is believed they will support the President against William J. Bryan if the one recommends a reasonable increase in the appropriations for the army and navy.

The estimate of Secretary Garrison will be for about 250 million dollars and Secretary Daniels will ask for that much or more. The President will trim those estimates down several million dollars after he has talked with the chairman of the Senate and House naval and military committees. Majority Leader Kitchen of the House has said that he would not support any program that called for 500 million dollars for the army and navy. Other Democratic leaders in Congress will oppose such large increases. Mr. Kitchen says the House will vote for what the President recommends.

Padgett to Washington Next Week.

Representative Padgett, chairman of the House committee on naval affairs, will come to Washington next week to confer with Secretary Daniels and President Wilson on the naval program in the House.

TO ENCOURAGE INVENTORS

Secretary Daniels Consults Advisory Board Members Regarding Plans for Research Laboratory.

Washington, Sept. 20.—Secretary Daniels, it was announced today, has requested members of the new naval advisory council on inventions, headed by Thomas A. Edison, to formulate ideas as to an experimental and research laboratory to be maintained by the navy department for the development of inventions. The secretary, in a letter to the members of the advisory council, asks them to be ready with their ideas when the council holds its first meeting next month.

"In addition to securing the advice of the most famous inventors of the country and in organizing in a practical and efficient way to get such advice," said Mr. Daniels in a statement tonight, "I intend greatly to develop the resources of the navy department itself and to increase largely its facilities for experimental work in the line of developing unperfected inventions."

"The department possesses, in the chiefs of the three bureaus of constructions, steam engineering and ordnance, and in the officers assigned to those bureaus, men splendidly qualified to carry to perfection any novel ideas. As a matter of fact, the work along those lines that is now being done under the greatest possible handicaps by the navy's own officers, would surprise the public were it expedient to reveal improvements of a more or less confidential nature."

An Allan Liner Is Ashore.

Quebec, Sept. 16.—The Allan liner Pretorian, inward bound, was in collision last night and is now ashore east of White Island, according to reports received here today.

LIVE STOCK EXCHANGE, KANSAS CITY, MO.

This Gem of Irish Wit.

Lieut. "Andy" Rohan, who was at his best when, on a dull and quiet evening in the headquarters at the old city hall, he gathered about him the night police reporters and told them stories of his youth and Ireland, told this one to his friend, "Matty" White:

"When I left Ireland, this munny a year ago, a lad in brogans and top hat, my mither came to the dock and she wept and wept at my going away. 'Never mind, mither mine,' says I. 'Amerikky is a land o' gold and opportunities. In a year I'll come back to ye—rich.' But I didn't. I didn't have annybody to go back to. My mither was here keepin' house for us seven lads, and every one of us was travelin' out o' the same station."—Chicago Herald.

He Got Them In.

The lazy student had been told that the instructor would ask for a list of the kings of Israel in the examination, so he learned this list, and went to the examination in high hope. To his horror, the questions contained no reference to the kings of Israel, and he looked in vain for a question that he could answer.

The latest question was: "Distinguish between the major and minor prophets."

In answer he wrote: "The Lord forbid that I should draw distinctions between these holy men, but the kings of Israel are these." Then followed the list.

Financial Reasons.

"Why don't you get your doctor to reduce that swelling in your face?" "I'm afraid he'll put it in the bill."

It has been estimated by engineers that one waterfall in Iceland can be made to produce 60,000 horsepower and another 50,000.

FASHION FIXES THE PRICE

Ignorance of Real Value of Fabric Plays Buyer Into Hand of Merchant.

That fashion and not intrinsic value skyrockets the price of fancy weaves was recently acknowledged by a cotton manufacturer, Beatrice Denison writes in Good Housekeeping. He was speaking of "gaberdine," the season's favorite.

"Why, do you know," he said, "it's the same old imitation cotton serge that we've been making and selling to retailers in small towns in the South and West for years? It never would 'go' in the large cities, but now that it's been given this new French name of the woolen goods so popular this spring, we can't make enough of it. Naturally, when the supply gets short, the price goes up. It's our chance—and the retailer's—and we both take it." This is an excellent illustration of the way in which ignorance of the real value of a fabric plays the buyer into the hand of the merchant.

Bird Protection in East Indies.

Dr. W. T. Hornaday, well known for his activity in behalf of wild-life protection in America, communicates to Science the gratifying news that measures have been taken by the Dutch authorities to prevent the extermination of birds of paradise in the Dutch East Indies. Shooting is now limited to three species, except in certain areas where the shooting of any bird of paradise is prohibited.

Keeping Up With the Times.

"The days are getting short." "That's nothing. So am I."

A wise married man never praises the gown of another woman unless his wife has one more stylish.

Triply Protected

First, the inner container of paper, next the big yellow carton, and then, the outer wrapping of waxed paper, sealed air-tight and dust-proof. Superior protection for the Superior Corn Flakes—

Post Toasties

These delightful flakes are made of the finest white Indian Corn, steam-cooked, daintily seasoned, rolled and toasted—crisp and golden-brown.

Post Toasties reach you fresh and delicious, perfectly protected and ready to eat. They are mighty good with milk or cream, or with any kind of fruit.
